

Contents book 2

Acknowledgement to the Courage of Women	23
Acknowledgements	25
Inspirational testimonials and cases	26
CHAPTER 1	
A quick review of the function and relationship of hormones	39
Natural progesterone and its relationship with other hormones.	40
Steroid pathway diagram	40
What is progesterone?	
Monthly Hormone Cycle in an ovulating menstruating woman, demonstrating where progesterone occurs	42
The multiple roles of progesterone in a nutshell	43
What is a progesterone receptor?	44
Why do women need progesterone?	44
Women who are most likely to be progesterone deficient are:	45
CHAPTER 2	
Estrogen - What is estrogen and symptoms of Estrogen Dominance	46
What is estrogen and what is its role?	47
What is Estrogen Dominance?	48
Symptoms of Estrogen Dominance	48
More reported symptoms of Estrogen Dominance	52
How come I have Estrogen Dominant Symptoms and yet I still ovulate?	53
Causes of Estrogen Dominance	54
CHAPTER 3	
Determining & assessing your Estrogen Dominance level in relation to Progesterone Deficiency - score sheet & progesterone dosage guideline	55
Estrogen Dominance, Progesterone Deficient score sheets	56,57
Using score sheet as a guideline to determine the right dose	58
How do I determine the right dose for me?	58
Interpreting your Estrogen Dominance score sheet	58
Times when physiological baseline does changes	59
Achieving the correct baseline dose	59
Score sheet results	60
Monthly assessing your score sheet	60
Review	60
When score sheets may fluctuate	61
CHAPTER 4	
Estrogen Dominance Wake Up Crisis - What to be aware of & specific use of progesterone	62
Estrogen Dominance Wake Up Crisis	64
Managing Estrogen Dominance Wake Up Crisis and how to use progesterone: Introduction	64
What is Estrogen Dominance Crisis & what can I expect with an Estrogen Dominance Crisis Wake Up? Terms and stages	64
Signs of Estrogen Dominance Wake Up Crisis 'Wake Up' or breakthrough of progesterone benefits	67
Reasons for Estrogen Dominance Wake Up Crisis recurrence	67
Estrogen Dominance Wake Up Crisis in relationship to dosages. Not enough progesterone	69
The pitfalls of too many breaks or not enough breaks.	70
Too much progesterone	72
Introduction of different hormones, such as testosterone, DHEA and estrogen can create Estrogen Dominance Wake Up Crisis	72
Changing route of administration of progesterone can cause Estrogen Dominance Wake Up Crisis. Vaginal application of progesterone and side effects	74
Other reasons for Estrogen Dominance Crisis. Inferior creams	75
Recap of managing Estrogen Dominance Wake Up Crisis	76
Assisting strategies reducing Estrogen Dominance and balancing your hormones when commencing progesterone	76
Strategies if Estrogen Dominance resurges after you have been using progesterone & have achieved asymptomatic balanced state	77
Check list and action	77
CHAPTER 5	
Reducing Estrogen Dominance naturally by reducing Estrogen Dominance symptoms & maintain hormonal balance long term by adopting liver cleansing principles, weight loss control &	

nutritional supplementation	82
Why is the liver important for hormone balancing?	83
The vital principles for a healthy liver	84
Make it a way of life - Liver cleansing principles	84
Reducing Estrogen Dominance by detox strategies	84
8 simple ways to detox your body	85
Reducing Estrogen Dominance by weight loss	86
Principles of weight loss including Syndrome X in a nutshell	86
Reducing insulin resistance - specific measures required to reduce insulin level and stabilise blood sugar levels	86
Reducing Estrogen Dominance with nutritional support	87
Reducing Estrogen Dominance through exercise	88
Why is it important not to overdose on progesterone long term and how it can affect weight, hormones and metabolism	89
Breaking or bending the rules on progesterone dosage	90
Golden Rules of Jenny Birdsey's formula for hormonal balance	90
Principles of reducing Estrogen Dominance naturally: Summary	91
CHAPTER 6	
Progesterone usage in relation to other medications, hormones and questions most asked	93
What drugs are not compatible with progesterone supplementation (or contraindicated)	94
Are there any side effects using natural progesterone?	94
I feel nauseous on progesterone, why is this?	96
Contraindications with progesterone & the most asked questions with other medications and treatment	97
Is progesterone addictive?	98
Summary of why progesterone is non addictive	98
Will progesterone help my vaginal warts?	99
Can I take the morning after pill on progesterone?	99
Caution/consideration when using medications in conjunction with progesterone	99
Can I overdose on progesterone?	
What can I do if I suspect I have overdosed?	101
Quick rule of thumb of checking out if you suspect you are overdosing	102
Following hormone balancing principles	103
CHAPTER 7	
Progesterone in relation to cortisol usage and other hormones and tests in question	104
Why can't I use progesterone if I'm on cortisol?	105
Saliva readings & questions related to the need of progesterone & other hormones	107
When is saliva assay for hormone profiling not suitable for accurate reading?	107
What other things do I need to be aware of when getting my saliva readings done?	107
Why do I have a low DHEA reading since starting progesterone, when all my other hormones are okay?	108
What is the purpose of giving DHEA along with progesterone & what are the benefits?	108
Is there another way of assessing Estrogen Dominance/Progesterone deficiency & the need for progesterone without expensive tests?	110
Can a machine guide you in your choice of progesterone cream?	110
General questions most asked: about concerns, fears & doubts on hormones, usage & other alternative options	112
If I have no symptoms & I am well & truly past menopause, could I benefit from progesterone?	112
Are there some women who just cannot take progesterone?	112
Is it possible that progesterone is over rated & a marketing sham?	113
Is it possible that progesterone is over rated by women?	114
Why it works for some & not for others:	114
CHAPTER 8	
Estrogen Usage & Considerations	115
Since I've started progesterone, my thrush has gotten worse. Why is this?	116
How does progesterone help control estrogen & why do they complement each other?	118
How does the non real estrogen (plant estrogen) benefit progesterone's performance?	119
When supplementation of estrogen can help: Cases where estrogen can be beneficial. Downside of estrogen therapy	121
What you can do if you suspect you are overdosing on estrogen	122
I am confused about estrogen. Is there an alternative for improving vaginal dryness and bladder problems?	122

About estriol estrogen	122
Alternative vaginal preparation to improving vaginal dryness, discomfort and other problems, other than using an estrogen cream	123
Is there truth that herbal therapies are non effective?	124
CHAPTER 9	
Progesterone usage in Depression & possible drawbacks	125
Progesterone usage in depression	126
My depression has returned on progesterone. Why?	126
Other vitamins & minerals that may assist in supporting your depression & a word about Hypericum (St Johns Wort) & other minerals	129
Why is depression often difficult to diagnose?	131
How would I know if my depression is due to hormonal imbalance?	132
Can depression tilt or cause my hormones to become unbalanced?	132
Why you need to assist your body so progesterone can assist your depression	133
What else enhances the serotonin levels & assist in overcoming depression?	133
I am finding it difficult to come off my antidepressants. Why?	134
Testosterone usage! - May or may not assist with depression	134
Summary strategies for natural anti-depression	136
CHAPTER 10	
Influences of progesterone & other hormones on moods, memory, foggy thinking & other associated issues	138
How do our hormones influence & affect our moods?	139
Progesterone's influence on pregnancy	139
Progesterone's influence on PMS	139
Other progesterone influences exerted in mood balancing & mental faculties	140
Testosterone's influence on moods	140
Estrogen's Influence on moods	140
Other important factors to consider	140
Progesterone & post natal depression	140
I have memory loss & I'm scared I have the start of Alzheimer's Disease. Will progesterone help Alzheimer's or prevent me from getting it?	141
A demonstration of hormonal imbalance, the resultant chemical imbalance:	142
Penny's case of severe mood alteration	142
CHAPTER 11	
Bleeding irregularities & progesterone usage in specific situations	144
About cycling & mother nature's rhythm & the purpose of progesterone	146
Understanding progesterone & estrogen's role in menstruation	146
What happens when progesterone is missing	147
Bringing progesterone back to the body to restore menstrual regularity for those NOT in the pre menopausal phase	148
How progesterone assists rhythm & restores balance in menstrual cycle	148
How to achieve regularity with progesterone	149
Coping with changing period patterns & how to use progesterone	149
Cycles that are now regular but have changed in length	149
What do I do in case of a sudden heavy bleed?	149
A case in point of heavy bleeding on certain progesterone creams	152
What do I class as inferior creams?	152
Experiencing Estrogen Dominance during the break	153
Missing a period	154
The pre menopausal dance	154
Aim goal and strategies to get menstrual cycles on track. For the non menopausal or pre menopausal woman	154
Summary of important points in the usage of progesterone and irregular menstruation	156
How would I know if I am in true menopause & what would my blood results read?	161
What is the reason why the FSH reading is high in menopause?	161
Nature's synchronisation and nature's phenomenon	161
Tailoring dose & usage for irregular menstrual patterns in different circumstances	161
Amenorrhoea	161
Menstrual irregularities - reasons & hormone usage	161
Can I use estrogen or the oral contraceptive pill if I have amenorrhoea & will it help bring my periods on?	161
Looking deeper into amenorrhoea & possible solutions	162
Progesterone usage for period regulation	163
Non menstruation does not necessarily mean not enough estrogen	163
Will progesterone assist in bringing back my periods?	164
Using progesterone in the pre menopausal dance phase	164
Obeying cyclic breaks	165
A case history of PCOS, bleeding irregularity, infertility and usage of natural progesterone troches	166

CHAPTER 12

Most common concerns, questions most asked & possible strategies & answers to specific problems

	173
Estrogen Dominance while menstruating	175
PMS on progesterone	176
Finding a sympathetic doctor & test for increased body hair problems	177
Regarding referring doctors	178
Severe weight gain & loss & stress	179
Lupus, SLE, steroids, weight gain, low libido	182
Skin concerns coming off the OCP & adopting natural progesterone as an alternative	187
Skin problems - progesterone & strategies	187
How can I reduce my chances of breast cancer & will progesterone help?	190
It is important to take other anti-cancer protective measures	190
Is there any point taking good oils, essential fatty acids if I am on cholesterol drugs? Is it necessary to take Co-enzyme Q10?	191
Medical options on Co Enzyme Q10	192
What may happen when CoQ10 production is reduced by statins?	193
Scared to go on HRT due to mother's experience - Hot flushes at 80, breast lumps	193
Too young for hormonal problems?	194
Dry Eyes	196
Endometriosis & the use of estrogen post hysterectomy	196
Bloating	199
Cysts on ovaries	200
Regarding men on progesterone and cardiovascular protection	201
Antihypertensive medication & hot flushes on progesterone	202
Breast cancer concerns & lack of libido following hysterectomy	203
My hair has started falling out again while I have been on progesterone. Why?	207
Hair loss and hereditary disposition	209
My nails have started to split again. Why?	209
Can I use progesterone on my animals?	210

CHAPTER 13

Progesterone usage in regards to various forms of contraception

	212
Clearing up confusion about different forms of contraception in conjunction with NHRT	213
Can I use progesterone with the pill as I do not wish to get pregnant?	213
Table of estrogen effects & progesterone effects	213
The OCP or different forms of contraception are designed to prevent pregnancy	214
Possible risks and side effects of the pill and HRT	215
Medical opinions & views & compounding pharmacists opinions vary on the incorporation of contraception with natural progesterone	217
A letter of concern about Implanon & the usage of progesterone	218
Answering questions	219
Will progesterone surge ovulation during time off (progesterone break) while on Implanon?	219
Will breaks on progesterone surge ovulation & can I get pregnant in my breaks on progesterone while I am on the Pill	219
Taking progesterone breaks while on OCP	220
Can I get pregnant on my breaks if not on OCP or progestins?	221
Contraceptive Patch	221
Other forms of contraception: T-Frame Mirena	221
Recap on the use of contraception and bio identical hormones.	222
What forms of contraception cannot be used with natural progesterone.	222
Bio identical hormones that can be used with contraception	222

CHAPTER 14

Fertility Progesterone & Nutrition

	223
I am under a fertility program using progesterone, receiving implantation of my fertilised eggs but I keep rejecting them. Why?	224
What went wrong in the rejection of the fertilised egg?	225
Reasons why we are seeing more infertility & reduction in progesterone manufacturing	227
The need to correct nutrition & underlying problems in fertility	229
Take one step back & address underlying issues and don't rush into fertility	229
Suggested regime that some women have found to have helped them with fertility	230

CHAPTER 15

Libido

	235
Libido & issues around lowered sex drive	236
Sexually appetites vary	239

A majority of women desired restoration of libido	239
Cervix removal: can lead to sexual discomfort & physiological changes	240
Understanding our physiological reproductive & sexual organs	240
Retain your cervix if possible	241
Hormonal disruption as a result of Tubal Ligations	241
Women can experience ejaculation	244
Modern society sending mixed messages regarding sexuality	244
Communication breakdowns	245
Men pay a high price for womens uncontrollable hormone invaders	246
Anti-depressant use can destroy libido	246
Other drug interference	246
Ovarian failure or dysfunction	246
Contraceptive Pill	247
Hormonal imbalance	247
Self perception	247
Other physiological problems	248
Physiological discomfort - painful intercourse (Dypaurnia)	248
Loss of vaginal elasticity	248
Progesterone's influence	248
Another deterrent to libido - Thrush	249
Other possible reasons for lowered libido	250
Using progesterone to restore libido	250
What happens if progesterone does not restore libido?	251
Guidelines when starting testosterone for improving libido	251
Testosterone summary: Helpful hints: Clitoral application	251
Things to observe when commencing testosterone	252
Body arousal and the purpose of an orgasm	253
Testosterone dosage guidelines based on my observation and feedback	254
Using testosterone guidelines and cautions	254
Signs for possible dose increase in testosterone	255
Signs for less testosterone dosage	255
CHAPTER 16	
Men & low libido	256
Women who pine for the loss of their sexual relationship	257
A letter of grief and clinical observations from a woman's heart, on libido and her issues	257
From many womens' perspective	257
Reasons for lowered libido in men	259
Libido - Men - Herbs & Vitamins	261
Natural hormones	262
Medication for libido - Viagra	262
Overcoming psychological barriers & attitude	262
Rechannelling sexual energy & possible advantages & disadvantages	263
When women's libido exceeds a man's & action becomes inert & stagnant - & every effort fails, what then?	264
CHAPTER 17	
Testosterone usage for men & women	268
Testosterone in relation to progesterone	269
Preparations that exist in Australia which contain true real natural testosterone and synthetic preparations	270
General effects of testosterone in women	271
How testosterone levels are determined in women	272
Can women use testosterone & what are the advantages & disadvantages & general effects?	272
Where does testosterone come from in our body?	272
Can you get testosterone from eating plants?	273
Women who may qualify for testosterone	273
What are the known medical side effects of natural testosterone in women?	273
Laws on testosterone	275
Where to get natural testosterone from	275
From manufacturing companies: Other manufacturing products	275
My general observation of women who need to be cautious using testosterone substitution/supplementation from women's experiences	276
Commonly asked questions about the usage of testosterone	277
I thought progesterone made this hormone & therefore it was the same as progesterone	277
I once had a testosterone implant which caused me to get lost of facial hair. Will the cream do the same?	277
Can I use natural testosterone to help my libido if on Adrocur (Cyproterone)	277
Can I use testosterone with other natural hormones	277
Can I use testosterone with HRT	277

General effects of testosterone in men	278
Determining levels & interpreting blood readings in men	278
Male menopause- Andropause	279
Testosterone & Osteoporosis	279
Precautions for men	279
Testosterone medical drug information sheet - women and men	280-290
CHAPTER 18	
Sexual Abuse & it's ramifications on health & wellbeing	291
Sexual abuse and possible boundaries to healing and health	292
Globally women desire to heal	292
Where do you start with sexual abuse issues	294
Acknowledgement & naming helps	294
Patterns can be broken & you have choices & you can change	295
Healing though recall & flashbacks	295
Recommended reading	296
What is sexual assault?	299
Why does sexual assault happen?	300
The facts about sexual assault	300
Who does sexual assault happen to?	300
Your rights: As a victim/survivor of sexual assault your rights are to:	301
Compensation claims	301
Stopping sexual assault	302
Services	303
CHAPTER 19	
General information & introduction to nutrition the importance of incorporating nutrition for hormone balancing & where does it all fit	304
About my philosophy in my approach & incorporation of nutritional supplementation	306
My approach to nutrition to achieve hormone balancing	
Why I choose the head on approach	307
About my own product sales	307
My reasons for an intensive initial nutritional regime	309
How do I know if I am purchasing a reliable, safe, nutritional product & are there dangers?	310
Nutrition in replace of hormone replacement therapy or natural bio identical creams	313
What happens if I do not want to take any hormone replacement therapy but my doctor advises me that I should?	313
What to expect on a saliva assay reading in helping to determine your choice in NHRT therapy	314
Can wild yam cream help me if I do not wish to use natural hormone replacement therapy?	314
About wild yams & are they different?	315
How can I recognise if a cream is wild yam & not progesterone?	316
Nutritional supplementation is not anecdotal	317
Grandma's remedies	321
Wrong or misinterpreted cravings	322
What if I cannot afford much nutritional supplementation, what is the most essential to use with my progesterone?	323
Liver principles & healing naturally with or without nutritional supplements and overview of dietary principles for a healthy liver	324
Guideline dosage of vitamins	325
Guideline dosage of minerals	325
Nutrition & principles in relation to hormone balancing	326
My principles of nutritional supplementation in hormone balancing at Jenny Birdsey consultancy	326
About specific products I use in hormone balancing and where to get them	329
CHAPTER 20	
The importance of phytoestrogen therapy and liver strategies in hormonal balancing	330
Phytoestrogen therapy and about phytoestrogens	331
Phytoestrogen categories and benefits of isoflavones, lignans, coumestans, herbs	332
Specific products I use - Femme Phase	333
The liver in relation to hormone balance	334
Nutritional requirements & important factors	334
Summary of the multi-factorial benefits & importance of the liver are:	334
Summary of liver in relation to hormone balancing	337
Livatone Plus	337
Why are all these ingredients required to assist the liver to function correctly & why isn't St Mary's Thistle enough?	338
CHAPTER 21	

The role of minerals and their importance in hormone balancing	340
Magnesium	341
Factors which can increase the need for magnesium are	342
Other tasks of magnesium and why it is important	342
Possible causes of magnesium deficiency	343
Other essential minerals: Selenium and MSM	344
Selenium and hormonal balancing	344
Other reported benefits of selenium by women have been	345
Signs of selenium toxicity warning	346
MSM: What is MSM and why is it so important?	346
Some beneficial actions of MSM	347
Summary of the beneficial actions of MSM	348
MSM ingredients	349
Nutrition in adjunct with progesterone for Osteoporosis & musculoskeletal problems for all ages	349
Other people who should consider higher maintenance and protection of bones, joints and tendons	351
A guideline formulation of bone and joint nutrient ingredients	351
How important is calcium supplementation if I am taking progesterone?	352
Samples of two calcium supplements and their ingredients	352
What about Caltrate?	354
CHAPTER 22	
Weight, hormones and nutritional assistors/supplements	355
Correcting blood glucose imbalances for hormonal balancing sugar imbalances	357
About glucemic balance and ingredients	358
How specific ingredients may exert influence on blood sugar levels	358
Correcting Metabolic imbalances, Syndrome X & insulin resistance for hormonal balancing	359
What causes Syndrome X & how would I know I had it?	359
Will progesterone cure or treat Syndrome X ?	360
Where progesterone fits into Syndrome X	360
Can Syndrome X occur as a result of progesterone deficiency & how is it related to hormonal imbalance & progesterone therapy?	361
What about PCOS & why can it cause Syndrome X	361
Associated problems concerning unstable blood sugar levels, sluggish metabolism & stubborn weight loss, cellulite, excessive appetite, hunger	362
The importance of metabolism & thyroid function correction for hormone balancing?	362
Weight loss and blood sugar stabilisation assistors	363
Metabocel and ingredients	363
What is Brindleberry	364
Other beneficial ingredients & their role in thyroid function and metabolism:	364
Tyrosine - Kelp	364
Word of advice on using fat inhibiting medications	365
Body type weight control supplements & herbs complementary to hormonal & metabolic constitution of specific body types	365
Lymphatic body type - supplement/ingredients	365
Gynaecoid body type - supplement/ingredients	366
Android body type - supplement/ingredients	366
Thyroid body type - supplement/ingredients	367
An alternative to sugar - Stevia	368
Why is refined sugar in large amounts so bad?	368
A word about refined sugar and the dangers of excessive consumption - summary	368
What can I use instead of sugar?	369
Nature Sweet - Stevia Liquid Drops	369
Guilt free chocolate bar and ingredients	370
CHAPTER 23	
Immunity problems, Adrenal Exhaustion & hormonal disruption	371
Adrenal Gland Exhaustion/Fatigue is very common now	372
Symptoms of Adrenal Gland Exhaustion can be	372
Why I have adopted the use of Olive Leaf extracts to assist hormone balancing	374
What to be aware of when starting & using Olive Leaf	375
Olive Leaf Extract/Olive Life	377
Who may benefit from Olive Leaf extract?	377
Olive Life elixir for children	379
A comment about Olive Life behaviour in addressing ailments such as colds	380
Strengthening the Immune System - A vital key to hormone balancing	380

Strategies of improving the immune system that women have found to be beneficial	381
About Co-Enzyme Q10	382
What exactly is Co-Enzyme Q10?	382
Other believed roles of Co-Q10	382
How do I know what to buy as they are all very expensive?	383
The manufacturing process of Co-Q10 is important	383
Recognising the importance of a good Co-enzyme QA10 (not synthetic)	383
Co-enzyme Q10 must be in the right base	383
Co-enzyme Q10 ingredients	384
Multivitamins	384
Natural anti-depressants	386
Liquid B Complex	387
CHAPTER 24	
Herbal hormone modulators & regulators - Vitex & Maca	388
Herbal hormone modulators & regulators - Vitex	389
Benefits reported	389
What exactly is Vitex	390
Maca	390
Who may benefit from using Maca	391
Where does Maca come from & what exactly is it?	392
What's in Maca?	
Other herbs that assist hormone balance	392
Hormone balance for children and teens	393
Strategies for hormone health and balance in adolescent years	394
Supplements for young women	395
CHAPTER 25	
Gastrointestinal problems, strategies in correcting bowel functions & its importance in hormonal balancing	396
Gastrointestinal problems, strategies in correcting bowel functions & its importance in hormonal balancing: Introduction	397
Dysbiosis	397
Anti Fungal diet principles	398
About carbohydrates and a word on diet & fungi	398
Will progesterone help with Irritable Bowel Syndrome?	399
What is Irritable Bowel Syndrome?	399
Symptoms	400
What causes IBS symptoms?	400
Managing IBS involves treating the symptoms	402
General bowel problems & management	403
Nutrients assisting gastrointestinal correction	405
Other principles & strategies in bowel correction	405
Bowel correction through improving transit time	405
About good gut flora, avoidance & management of constipation	406
Some common causes of constipation	407
Fibretone ingredients	407
Nutritional support for gastrointestinal tract	408
Sample ingredients Colon Eze	408
Probiotics	408
Prodophilus ingredients	409
CHAPTER 26	
Essential Fatty Acids and other components important in hormone production & balance	410
Essential fatty acids (EFA's) and their importance in hormone production and balance and other valuable functions: Introduction	411
Ratio balance in essential fatty acids is important	411
We can divide the fats that kill us into four groups - bad fats	412
Why cooking oils become dangerous	412
Sources of Omega 3 and 6 essential fatty acids	414
Care of essential fats in manufacturing. Process is important	414
Summary of benefits of essential fatty acids	414
Why it is important to take antioxidants with EFA's	415
Essential fatty acids chart and the Omega 3 & 6 pathways	416
General-Other products found valuable by women in Hormone	
Balancing Programs	417
Liquid Iron	417
Ferro Force	417
Spirulina	417
Natural Vitamin C	417
Vital C with antioxidants ingredients	417
Silica	418
Natural Vitamin E800-1000 IU	418
Herbal Teas	418

CHAPTER 27	
Summary Review Regime	422
General points on nutritional supplements & helpful information to guide you in your choices	423
Quick Review Guideline	424
Basic peri menopausal, menopausal kit	426
Menopausal / hormonal balancing grocery list	432
Interpreting & understanding progesterone products with other ingredients in them	432
Interpreting ingredients in ready made bio identical products: An example of a progesterone cream & possible added ingredients & how to interpret this for demonstrating your understanding only. I am not a biochemist.	433
CHAPTER 28	
Clearing up public and professional misconceptions	434
Public misconceptions & common confusions - to clear up some public misconceptions	435
My attitude & observation of conventional medicine and the alternative health industry	435
Progesterone scepticism & resistance to natural progesterone is not just with doctors & the medical fraternity	436
General problems & confusion around progesterone usage	436
My attitude & observation of doctors attitudes	437
Letter received recently demonstrating & explaining doctors dilemmas in prescribing & women's difficulty in obtaining a script	438
Why do so many gaps exist between women & their doctors?	438
Is technology intruding on our relationship with our doctors?	438
Food for thought - Time to work together in the Health Industry	439
Not all doctors are fossilised, closed in mindset	439
Good, old fashioned doctor/patient relationship needs rekindling	440
Restoring confidence & alleviating fears is one of the keys to doctors	440
Pitfalls in not being honest with your doctor and/or naturopath	441
Balancing medication use & natural alternatives	441
About my wild yam opinions	442
Confusion about progesterone creams	442
Wild yam products are beneficial but not for progesterone deficiency	443
There is a possible window of opportunity in incorporation of wild yam & progesterone cream at a different time of cycle, ie. in the break off progesterone	443
Nothing stands still - change is inevitable	443
Public and professional misconception about my work	444
Do I get paid for product or cream promotion?	444
Where do I get my money from	444
I am not sponsored	445
Other sources of funding: Donations	445
Book sales infiltrating into health organisation	445
CHAPTER 29	
Laws on progesterone & bio identical hormones	447
How to obtain natural progesterone & what to be aware of	448
USA drug law does not apply to progesterone usage	449
Why is progesterone labeled an S4 drug even though its natural?	450
Do I provide a list of prescribing doctors?	451
How do I find a doctor to prescribe when my doctor refuses?	451
What cream do I use?	451
Regarding cream choices & the common questions asked	452
My stance on Pro-Feme & its legislation	452
Sourcing progesterone cream in Australia from a compounding pharmacist	452
Regarding cream choices & the common questions asked & sourcing NHRT	453
Confusion on choosing the right progesterone cream & which compounding pharmacists to use in Australia & New Zealand	453
Questions to ask your compounding pharmacists	453
Deciphering answers you may get	454
Our cream provides an adequate transport mechanism for the progesterone	454
Our cream delivers progesterone to the blood stream	454
What proof would there be if the cream was working satisfactorily?	454
Some terms being used in the compounding industry	454
Don't be frightened off by preservatives in cream	455
Sourcing natural progesterone cream	455
Sourcing natural progesterone cream in Malaysia	455
CHAPTER 30	

Resources and medical references	456
Sourcing and stockists of my books	
Resources, recommended reading and invaluable websites	457
Nutritional websites and contacts	459
Medical references	460
CHAPTER 31	
Contents of Book 1 revised, Natural Progesterone-the world's best kept secret	464
